Hanako Kurashiki
Dept. yyy.,
yyy University
yyy@yyy

I. INTRODUCTION

By default, this style file tries to compose a two-column manuscript. If you prefer to make one column paper, declare onecolumn as an option for `\documentclass`. Containing of colorful figures and pictures is absolutely welcome.

II. PDF

- 1) Please embed all fonts in your PDF as possible as you can.
- 2) Do not exceed 10 MByte.
- 3) Do not make any protection for your PDF. All manuscripts are subject to be manipulated (to put page numbers, logo, etc.)
- 4) Even this style file produces letter size DVI file by default, please convert it into A4 PDF format. Do not use US letter format since the proceedings will be printed in A4 size. By using this IEEE class file, a wide bottom margin may be left, but this is regulated by the IEEE publication policy.

III. CONCLUSIONS

Skipping “Conclusions” or “Concluding remarks” is not a bad idea if you have many contents for the text body.
